

Interactive Dashboard Application for E-commerce Sales Analytics

Marcel Dietl, 27.01.2024

Task 1: Interactive Dashboard Application

Welcome Back to your Sales Analytics Dashboard!

Set custom filters to analyze your sales

2020-01-01 → 2023-12-31

United States Germany France

Office Supplies Technology

Total Sales

\$1,402,916

Sales Volume

Sales Distribution Insights

Net Profit

\$222,592

Profit Margin

15.87%

Profit Over Time

Total Shipping Cost

\$125,671

Average Shipping Cost

\$24.73

Shipping Mode Information

Customer Insights

Customers Favorite Products

1. Cisco TelePresence ...	\$33,957
2. GBC Ibimaster 500 M...	\$21,118
3. Canon imageCLASS ...	\$15,750
4. GBC DocuBind TL30...	\$13,455
5. Honeywell Enviracair...	\$12,627

Task 2: Cloud Deployment Architecture

Automated deployments
via CI/CD pipelines

Frontend

Backend

<https://dashboard.de>

Application Load
Balancer (ALB)

Elastic Container Service on Fargate (serverless)

Elastic
Container
Registry

External
Systems

Database (e.g., user data, caching, etc.)

Potential Difficulties and Challenges

Scaling

Auto-scaling based on
custom CloudWatch Metrics

Latency & Performance

Optimized data retrieval with caching
Geographically distributed regions

Security

Set up IAM roles
Use SSL encryption

Management Overhead

Avoid management of EC2
instances by using Fargate

Task 3: Natural Language Integration
